

Sam Sample 27 Mar 2013

CRTB2

REPORT STRUCTURE

The Standard Report presents Sam Sample's results in the following sections:

1. Guide to Using This Report

- Introduction
- The Standard Report
- Supplementary Reports
- Reference Group (Norms) Used
- Understanding the Charts and Tables

2. Verbal Critical Reasoning

- Scale Description
- Result Description
- Results Chart

3. Numerical Critical Reasoning

- Scale Description
- Result Description
- Results Chart

4. Results Summary

Critical Reasoning Profile

DISCLAIMER

This is a strictly confidential assessment report on Sam Sample which is to be used under the guidance of a trained professional. The information contained in this report should only be disclosed on a 'need to know basis' with the prior understanding of Sam Sample.

The results must be interpreted in the light of corroborating evidence gained from feedback and in the context of the role in question taking into account available data such as performance appraisals, actual experience, personality preferences, motivation, interests, values and skills. As such the authors and distributors cannot accept responsibility for decisions made based on the information contained in this report and cannot be held directly or indirectly liable for the consequences of those decisions.

GUIDE TO USING THIS REPORT

INTRODUCTION

Critical Reasoning is an ability that is central to all roles that require the incumbent to take logical decisions based on complex information. The Critical Reasoning Test Battery (CRTB2) has been developed to this core ability. The test comprises two sub-tests which measure verbal and numerical critical reasoning. The Critical Reasoning Test Battery contains problems which are relevant to management and business functions and was deigned to distinguish between individuals of high ability.

The Critical Reasoning Test Battery can help identify people who are capable of:

- Weighing up evidence logically
- Identifying trends in data
- Isolating the key points in an argument
- Understanding complex arguments
- Assimilating all the evidence
- Quickly comprehending statistical and financial information
- Processing information quickly
- Making well-informed business decisions
- Solving problems effectively

In constructing the items in the Verbal and Numerical Critical Reasoning Tests special care was taken when writing the items to ensure that in order to correctly solve each item it was necessary to draw logical conclusions and inferences which stem from the passages and tables. That is to say, the items assess a person's ability to think in a rational, critical way and make logical inferences from verbal and numerical information, rather than simply check for factual errors and inconsistencies.

The additional diagnostic (raw) scores, which are provided after the profile chart for each of the Verbal and Numerical Tests, enable assessors to establish the respondent's test taking style. These provide additional information which allows assessors to determine the trade-off the candidate has made between speed (Percentage Items Attempted) and accuracy when responding to the test items. Assessors should be mindful of the need to interpret these raw scores in the context of the candidate's scaled (stanine or percentile) score on each subtest, as **both** accuracy and speed will increase for higher scorers.

THE STANDARD REPORT

The standard report provides a detailed breakdown of the respondent's performance across the sub-scales using narratives and profile charts.

SUPPLEMENTARY REPORTS

The information gained from this report can be used in conjunction with other supplementary reports. The supplementary reports available for the Critical Reasoning Test are:

Results Spreadsheet

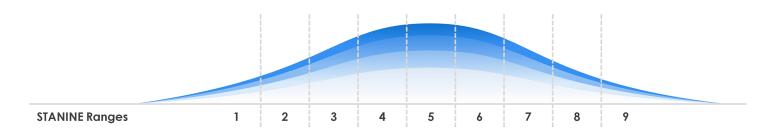

The results spreadsheet provides a summary of the respondents' results across the sub-scales in the form of a spread sheet.

Respondent Feedback Report

The feedback report is intended for sharing directly with respondents for their personal insight. It provides a breakdown of the respondent's performance across the sub-scales using simplified narratives.

REFERENCE GROUP (NORMS) USED

A reference group is used to evaluate Sam's results. His results are presented as standardised STANINE scores with Mean=5 and SD=2 as demonstrated in the following chart.

The following norms were used to generate this report:

Test	Norm Used	Sample Size
Verbal Critical Reasoning (VCR2)	Graduates\Managers	365
Numerical Critical Reasoning (NCR2)	Graduates\Managers	364

UNDERSTANDING THE CHARTS AND TABLES

Much of the information presented in this report is presented in the form of charts or tables, which is why it is important to be able to read them accurately and make use of the information contained within them. The following elements are used to present the data in the charts and tables:

Element	Description
Raw	The Raw score is simply the (un-scaled) sum of correct responses the respondent receives on the test scale.
Attempted (Att.)	Is the number of questions the respondent has attempted to answer regardless of whether the answers were correct or not.
STANINE Score	Is a standardised scale used to compare respondent results. The STANINE Score has a Mean of 5 and Standard Deviation of 2. This score is presented as a 9-point scale in the results chart.
Standard Error of Measurement (SEm)	The Standard Error of Measurement is a measure of the range within which an individual's hypothetical 'true' score is likely to fall within 68% probability. It is presented as blue error bar surrounding the respondent's obtained STANINE score in the results chart.
T Score	Is another standardised score used to compare respondent results. It is similar to the STANINE score, though has a Mean of 50 and Standard Deviation of 10. This score is presented as a numerical value in the results chart.
Percentile Score (%ile)	A value which reflects the percentage of people in a sample who score below a given raw score. This score is presented as a numerical value between 0 and 100 in the results chart.
Percentage Items Correct	Is the percentage of the number of correct responses over total number of items.
Percentage Items Attempted	Is the percentage of the number of items attempted over total number of items.
Percentage Accuracy	Is the percentage of the number of correct responses over the number of items attempted.

VERBAL CRITICAL REASONING

Scale Description

The verbal component of the Critical Reasoning Test assesses a person's ability to critically evaluate complex verbal arguments. Consisting of items which involve drawing logical conclusions and inferences from passages of text, this test measures the ability to correctly understand complicated written arguments and accurately perceive the consequences and corollaries of these arguments. While this test is a measure of reasoning ability rather than educational achievement, a person's score on this test will nonetheless be sensitive to educational achievement.

Result Description

Sam Sample's performance on the verbal component of this test places him within the higher end of the average range when compared to other Graduates\Managers respondents. Such a score suggests that his ability to critically evaluate written arguments is as good as, or slightly better than, that of most typical graduate calibre personnel. He shows a slightly better ability than many graduates to correctly deduce the logical consequences of a given argument and accurately perceive the subtle shades of meaning that are found in complex prose. Consequently, he should be able to understand complicated written instructions and reports with a fair degree of ease and will be able to explain these ideas in a relatively clear way.

RE	SULTS CHART									
Scale	Description	Raw	Att.	1 2	2 3 4	5	6 7	8 9	T Score	%ile
VCR2	Verbal Critical Reasoning	23	40			-	6		53	62
Norm Used: Verbal Critical Reasoning (VCR2) = 365 Graduates\Managers										
Scale	Description	Percentage Items Correct		Percentage Items Attempted				Percentage Accuracy		
VCR2	Verbal Critical Reasoning	58		100				58		

NUMERICAL CRITICAL REASONING

Scale Description

The numerical component of the Critical Reasoning Test assesses a person's ability to use numerical information which is presented in a tabular form in a logical and rational way. The test consists of items which assess the candidate's understanding of a variety of types of tables of numerical information. These include tables of such information as share prices, economic indicators (e.g. exchange rates, rates of inflation, departmental budgets etc.) In order to assess their understanding of this information the test taker is required to identify trends and patterns in the data and perform simple numerical transformations and estimations based on a selection of the appropriate information in each table.

Result Description

Sam Sample's performance on the numerical component of this test places him in the 'below average' range when compared to other Graduates\Managers respondents. This suggests that Sam Sample will not be as efficient as many graduate calibre personnel at interpreting numerical information which is presented in tabular form. In addition, he may have some difficulty in accurately drawing logical conclusions and inferences from such sets of data. While he should be able to cope with the demands of many jobs which require dealing with numerical information and making decisions on the basis of such data, he will not be as efficient as most graduate calibre staff in this area.

RE	SULTS CHART										
Scale	Description	Ro	aw Att.	1 2	3 4	5	6 7	8	9	T Score	%ile
NCR2	Numerical Critical Reasonii	ng (5 25		3					40	15
Norm Used: Numerical Critical Reasoning (NCR2) = 364 Graduates\Managers											
Scale	Description	Percentage Items Correct		Percentage Items Attempted				Percentage Accuracy			
NCR2	Numerical Critical Reasoning	24		100				24			

RESULTS SUMMARY

	CRITICAL REASONING PROFILE					
Scale	Description	Raw	Att.	1 2 3 4 5 6 7 8 9	T Score	%ile
VCR2	Verbal Critical Reasoning	23	40	6	53	62
NCR2	Numerical Critical Reasoning	6	25	3	40	15

Norms Used:

Verbal Critical Reasoning (VCR2) = 365 Graduates\Managers Numerical Critical Reasoning (NCR2) = 364 Graduates\Managers
